### PROFILE SUMMARY

I'm a motivated Java developer with a strong foundation in Java programming and object-oriented principles. Passionate about building efficient applications, I am eager to apply my core Java knowledge in real-world projects. A quick learner, I am committed to continuous growth and staying updated with industry trends.

### PROJECTS DETAILS

#### IBM

Data-Driven insights on Olympic Sports Participation and Performance.

- This project aims to analyze trends in Olympic sports participation and performance using comprehensive data sets from various Olympic Games.
- By examining historical participation rates, medal distributions, and emerging sports, we seek to uncover insights that highlight the evolution of the Olympics and the factors influencing athlete success.

#### BE - Final Project

Criminal Face And Anomaly Detection.

- Criminal Face and Anomaly Detection is a system designed to identify individuals involved in criminal activities using facial recognition technology.
- It also detects unusual behaviors or anomalies in real-time, helping enhance security and prevent potential threats.
